TRAINING CONTENTS

The TRAINER JULIAN

Mr Julian is A Microsoft Certified Trainer & having started the career in auditing and then moving on into Accounts & Finance having a total of about 18 years of working experience in the corporate world. Successfully setting up a new accounting system and migrating the old data into the new system. Created sub systems with Excel VBA programming.

Having accumulated hands on experience in MS applications over the years and developing a passion to share with others, I began to venture into the IT Training Industry in the year 2000.

A website on Excel Macros (VBA) tips for Beginners was subsequently set up to reach out to those wanting to learn basic VBA. Using simplified sample codes and examples made the website a hit for beginners as other websites on Excel VBA were simply too difficult to understand.

Conducting public training for working professionals as well as in house group trainings for corporate clients. Past corporate clients are:

IJM Bhd, Sunrise Bhd, Sunway Holdings Bhd, Petronas Bhd, PLUS Bhd, Khazanah Nasional Bhd, Air Asia Bhd, Public Bank Bhd, Malayan Banking Bhd, CIMB Bhd, OCBC Bank, Bank Islam, Astro, Price WaterhouseCoopers, Tesco Stores (M), Honda (M) Sdn Bhd, DKSH (M) Holdings Bhd, Vista Point Technologies (M) Sdn Bhd, Frescale Semiconductor (M) Sdn Bhd, ORIX Leasing (M) Bhd, Nippon Paint (M) Sdn Bhd, OMYA (M) Sdn Bhd, FedEx Express, Yeoh Hiap Seng (M) Bhd, TNT Express Worldwide (M) Sdn Bhd, Fraser & Neave Holdings Bhd.

Programming techniques

- Communicating With The User
- Customising The Message Box
- Customising The Input Box
- Using The Inputbox Method
- Using The With... End Statement
- Controlling The Program Flow
- Using The Select Case Statement

Chapter 2

Creating User Defined Functions (UDF)

- Single Argument UDFs
- Multiple Argument UDFs

Categorising UDFs

Chapter 3

Creating Custom Forms

- Changing Userform Properties
- Loading & Unloading Forms
- Controls In A Userform
- Control Command properties

Programming Userform

Customising Controls in the Toolbox

Chapter 4

Creating Quick Access To Procedures

- Running Procedures from Userform
- Creating A Tool Bar
- Creating A Command Bar
- Creating A Short Cut Key

Programming Automatic Procedures

- Loading & Unloading Menus Automatically

Chapter 5

Distributing Your Application

- Add In Files
- Creating An Add-In File

Chapter 6

Building A Calculator

Capturing Data From User Forms
